

Product Main Number 1999905389

ABENA Wing, M3, blue colourcode, Premium

- ✓ 100% breathability for healthy skin and optimum comfort
- ✓ Top-Dry Technology for dry surface to protect the skin
- ✓ Optimum fit with fluted elastics and soft belts
- ✓ Easy-to-adjust fasteners for repositioning
- ✓ Support healthy skin balance

Product Description

ABENA Wing is our Premium range of belted products for moderate to heavy incontinence featuring the Nordic Swan Ecolabel. All incontinence products are fully breathable and are fitted with leakage barriers for extra protection. The dermatologically tested products feature ABENA's Top-Dry Technology which ensures skin integrity and optimal skin care by keeping the exposed area comfortable and dry even after multiple voids. The soft nonwoven belt, mounted through the backside of the product, is a good fixation solution for all body shapes. With the extra belt length you do not need a separate extension belt. The optimum fit is also provided by the fluted elastics on the front and rear of the product. The easy to adjust fasteners (velcro hooks on the belt and combi tape on the product) can be repositioned several times. The unique fitting properties make ABENA Wing an excellent solution for users who are able to self-manage. The wetness indicator with graduation scale guides the user and caretaker to the product with the right absorption level and aids product changes. The Odor control system minimises unpleasant smells.

Specifications

Brand	ABENA
Sub-Brand	Wing
Size	M3
Colour	White
Features	Blue colourcode
Material	ECF fluff, PE, breathable textile backsheet (BTBS), elastane, nonwoven, PP, resin, SAP
Length/depth	830 mm
Width	360 mm
Hip size	70-110 cm
Tolerance	+/- 10%
Absorption Rothwell	3000 ml
Gender	Unisex
Quality level	Premium
Certificates	CE. Nordic Swan Ecolabel. MD. UKCA.
CE Class (Medical Devices)	Class I
Product or test standards	ISO 11948-1, ISO 9001, ISO 13485, ISO 14001
Directives, regulations and acts	MDR (EU) 2017/745
Storage Instructions	Store dry, room temperature and no direct sunlight.
Product Disposal Instructions	Can be disposed of with normal household waste sorted according to local regulations.
Packaging Disposal Instructions	Can be recycled or incinerated.

Instructions for use/application

Easy product size recognition by colour codes, names and numbering systems. Always measure the hip circumference to select the right size and choose the correct absorption level to avoid leakages. Make sure that the brief fits tight and that it is comfortable for the user. If it does not fit tight in the groin area, attach the belt higher up on the hip. Belted products for moderate to heavy incontinence are an excellent solution for users who are able to self-manage, applying the products themselves. You can apply these products in an upright position (both from the front and from the back), as well as in seated and lying positions. See the application guide in our brochure for detailed information.

The Swan label, also known as the Nordic Swan Ecolabel, is an official Scandinavian environmental label. Products with the Nordic Swan Ecolabel meet stringent environmental requirements with regard to raw material production, use, documentation and safety.

Regulation (EU) 2017/745 is a regulation of the European Union on the clinical investigation and sale of medical devices for human use. It repeals Directive 93/42/EEC, which concerns medical devices, and Directive 90/385/EEC, which concerns active implantable medical devices, on 26 May 2021.

The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products and medical equipment.

The UKCA mark guarantees that a product is safe to use and complies with all safety precautions in line with product standards and legislation of the UK.

Your guarantee that our products have been tested for ingredients which can potentially cause skin irritation. Tests conducted by an independent third-party laboratory.

Odor control is a critical factor in ensuring discreteness for the user. ABENA's incontinence products are designed and engineered to ensure that minimal Odor arises from the product.

Effective leakage barriers, both visible and invisible and latex-free elastics ensure a snug fit, which reduces the risk of leakages.

Wetness indicator is a liquid-sensitive strip that changes colour or fades out indicating when it is time to change the product.

A combination of 100% breathability, Top-Dry and leakage protection provides a dry surface and healthy skin even after multiple voids maintaining the skin's natural pH balance.

The product does not contain latex.

Drop system indicating absorption. The more drops, the higher the absorption. Ranges from 1 to 9 drops.

The product is fully breathable for the comfort of the user; also during long-time use. Helps maintain skin integrity.

Unique Top-Dry Technology that provides a rapid absorption and ensures a dry surface even after multiple voids.

The bag is 30% PCR, which means made from plastic materials used by consumers. This will allow us to reduce our plastic waste and to help take care of the environment.
